

Build your design on top of template.

*** Template must be locked & in separate layer!**

If your design has a background other than white, make sure it goes all the way to the red "bleed line."

If you have graphics that should go all the way to the edge, they need to be extended all the way to the bleed line, as well.

For best results, submit vector-based artwork.

*** Make sure all vector text / fonts are outlined!**

If you do not understand any of these instructions, we encourage you to refer to google search or youtube videos, for clarification.
